HUALAPAI UNIT WARDEN: Pamala Rider pamala.rider@mtctrains.com

FACILITY PROFILE

Capacity: 3674 inmates

Contracting Agency:

Arizona Department of Corrections
(AZ DPS License # 1000419)

Security Level: Minimum and Medium

ACCREDITATION

- Correctional Education Association (CEA)

BACKGROUND

Arizona State Prison Complex – Kingman is the second contract MTC operates in Arizona, along with the Marana Community Correctional Treatment Facility. The complex secures both minimum and medium custody inmates and meets the exacting standards of the Arizona Department of Corrections (ADOC).

The Cerbat unit secures minimum custody offenders and the Hualapai unit secures medium custody offenders.

COMMUNITY SERVICE

The Arizona State Prison Complex – Kingman provides hundreds of hours of community service, including to these organizations:

- Arizona Department of Transportation
- Boys & Girls Club of Kingman
- City, County, and State Parks
- City of Kingman Parks
- Kingman Aid to Abused People
- Kingman Unified School District #30
- Mohave Community College-Kingman, Bullhead City and Lake Havasu Campuses
- Sarah's House
- Special Olympics
- Veterans Groups

REHABILITATION PROGRAMS

The Arizona State Prison Complex – Kingman offers many rehabilitation programs including:

Education

- Adult Basic Education
- Creative Writing

- Financial Literacy
- Introduction to Art
- Nutrition Pathways
- Thinking for a Change
- Victim Impact

Spiritual

- Maximized Manhood
- Men's Fraternity
- Thoroughly Furnished

ARIZONA STATE PRISON COMPLEX– KINGMAN

SECURITY ENHANCEMENTS

MTC

Prior to receiving medium security inmates in the Hualapai unit, the facility was audited and accredited by the American Correctional Association. Following the incident in July 2010, MTC ordered a comprehensive assessment of all security policies and procedures. In light of that assessment and subsequent audits by the Arizona Department of Corrections, MTC implemented the following security enhancements:

AUGUST 2010

- New acting complex administrator, warden and security chief were installed
- Alarm system was thoroughly inspected
- Inmate movement was restricted
- The number of officers patrolling the perimeter increased
- Perimeter vehicles equipped with hand held high-intensity lights
- Foot patrols around the perimeter were increased
- Traffic was routed away from perimeter road
- Random Inmate pat searches Increased
- Controlled movement and staggered recreation instituted

SEPTEMBER 2010

- Aggressive perimeter intrusion procedure training implemented
- Inner and outer fence checks increased to twice each shift
- Staff certified in maintenance, troubleshooting and repair of alarm system
- Alarm response procedure training increased
- Emergency response plan reviewed and revised
- Staff retraining on management of medium security inmates conducted
- Static perimeter post installed
- Static observation post installed on southeast corner
- Traffic control “face to ID check” procedures implemented
- Road barriers installed on internal road leading to the Cerbat unit
- Installed blocking gates on existing shared use road
- Pedestrian gate in perimeter fence removed
- Door control computers reprogrammed for audible door alarm

OCTOBER 2010

- New half-mile road constructed to keep all unofficial vehicles farther from prison complex
- Perimeter detection hardware upgraded
- Staff retrained on alarm response procedures and post orders
- Staff trained in “mock escape” drills
- Escape scenarios played out and phone trees tested

NOVEMBER 2010

- 150-foot security fence installed between dorms
- Shift briefings set up at the Hualapai unit

DECEMBER 2010

- 1,400 feet of razor wire fence installed at key locations throughout facility
- 10 English and Spanish “stay back” perimeter fence signs installed

JANUARY 2011

- Ultra barrier installed along canopies outside the Hualapai unit
- Ultra barrier installed along canopies outside the Cerbat unit
- Side mounted lights installed on all perimeter vehicles
- Vehicle gate control moved away from sally port

FEBRUARY 2011

- A one-mile long second perimeter fence was installed around the Hualapai medium security facility. The fence is 10-feet high with four strands of razor wire, exceeding Arizona Department of Corrections standards

ONGOING

- Rigorous security audits conducted by facility leaders, MTC and Arizona Department of Corrections
