ANALYST REVIEW – USPTO REPORT

Search Information

Type of Search: **U.S. Full Search**
 Mark: **ACI**
 Goods/Services: **PROVIDING MANPOWER FOR MANUFACTURING, PRINTING, CALL CENTER**

Data Information

This search report includes information from the USPTO Official Gazette published on **04/07/2015** and pending applications filed through **04/09/2015**. The pending applications are received from the U.S. Patent and Trademark Office and are updated to our database as they are made available.

Our database includes active USPTO text records dating from **1884** to present.

All queries in the Search Strategy below have been applied to all active applications and registrations in our database, as well as inactive USPTO applications and registrations from 01/01/2010 to the present. Inactive USPTO applications and registrations from 01/01/1984 – 01/01/2010 were searched for identical trademarks.

Last Reported Owner

“Last Reported Owner” is our best determination of the owner of a trademark, based on a programmatic analysis of USPTO trademark records and any assignment transactions associated with the trademark. In determining “Last Reported Owner”, we exclude recorded documents representing security interests, liens and other transactions which ordinarily do not result in a change of ownership.

Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

Global Filings

A Global Filings flag indicates how often owners of cited USPTO trademarks have filed for protection of the cited marks outside the United States. We compare the owner and trademark, as listed in our proprietary USPTO database, to our worldwide trademark databases. The worldwide trademark databases include first publications since January 1, 1976. (For China, only trademarks published since January 1, 1986 are included). In most of the over 200 countries, first publications are new applications published in the Official Gazettes for opposition purposes.

Please Note: Global Filings provides an indication of international trademark filings, but should be considered advisory information only, due to possible inconsistencies in the data and the update frequency of trademark records provided by international trademark offices. Furthermore, the documentation does not include renewals or indications about the subsequent fate of the applications retrieved, such as registrations, rejections, withdrawals, amendments and partial cancellations. For additional information, please refer to the electronic version of this search report, accessible through your SAEGIS™ Inbox.

Earliest Date in Record

The Earliest Date in Record is an added field derived from a programmatic review of all available fields within a given record to estimate the earliest date by which the trademark can claim protection. Fields reviewed can include the Date Filed and First Use Dates for both U.S. and international protection. Please note that not all records with a status of MISASSIGNED will be included, as many of these records do not contain dates. This field is designed to be a helpful reference tool only; further research may be required to determine the mark's priority rights.

ANALYST REVIEW – INTERNET DOMAIN NAME REPORT

Search Information

Type of Search: **U.S. Full Search**
 Mark: **ACI**
 Goods/Services: **PROVIDING MANPOWER FOR MANUFACTURING, PRINTING, CALL CENTER**

Important Notices

Due to the constantly changing nature of the Internet, and the reasons detailed below, it is possible that the status of domain names may change between the time this report is generated and the time you receive this report. Therefore, we strongly recommend that you conduct additional domain name searching before attempting to register a domain name or forming a final opinion on the availability of a trademark or domain name.

- * The dynamic nature of the Web allows for the registration of new domain names virtually continuously, 24 hours a day.
- * All steps are taken to ensure the completeness and accuracy of our database. However, due to registrar/registry administrative procedures during domain name registration, some domain names may not be present in our database.
- * Domain name registrars do not report domain names which are not currently registered, nor do they report domain names which may be "on hold" with the registrar.
- * All domain names cited in this report should be considered to be REGISTERED as of the time this report was generated.
- * For common names, retrieval may be limited to the identical spelling of the name as ordered.

Due to the nature of the Web, and because we do not filter Web content, it is possible that the Web Page Lookups included in this report may contain objectionable material. If you wish to avoid the possibility of receiving such material, please contact us to "opt out" of Web Page Lookups.

Data Information

This report is the result of a computerized search of our database of top-level domain names. Our database is regularly updated with domain name data from all ICANN-accredited registrars, including but not limited to the following suffixes.

Additional domain extensions may also be reported, including new gTLDs added since 2014 that have been released and are available for search. [Click here](#) for the listing of new gTLD extensions that were searched for this report.

- .aero – air transport industry
- .asia – Asian businesses and individuals
- .biz – business
- .cat – Catalan language/culture
- ***.ca – country code for Canada
- .com – commercial
- .coop – for cooperatives
- *.edu – educational institution
- ** .gov – U.S. Government agency
- .info – information
- .jobs – human resource management
- .mobi – content designed for mobile devices

- .pro – for credentialed professionals
- .tel – telephone/communications
- .travel – travel agents, airlines, hoteliers, tourism bureaus, etc.
- .us – country code for the United States
- .xxx – adult

This report covers domain names updated to our database as of the following date:

APR 15, 2015

Data Information

* The United States Department of Commerce no longer allows collection of the .edu domain names. Some records remain and may be cited from collections done prior to this restriction.

** The General Services Administration (GSA) no longer allows collection of the .gov domain names. Some records remain and may be cited from collections done prior to this restriction.

*** The .ca data is only included in Domain Name reports ordered by clients located in Canada and in full availability searches that include a Canadian Full component (e.g. Canada Availability Searches, Canada and US Combination Availability Searches). Thomson CompuMark's .ca database was last updated on December 11, 2000 when the authority for the .ca file transferred to the Canadian Internet Registration Authority (CIRA) and file updates were no longer made available.

In addition to searching Thomson CompuMark's .ca file, a search is conducted to locate domain names associated with the exact trademark along with the .ca extension, any results found are reported in the Domain Section of the report.

REPORTED OWNER INDEX

The following is an alphabetical listing of names reported in the OWNER field of records cited in this search report, with all marks owned by a single entity carried under that entity. (Due to inconsistent spellings, corporate designations, and other discrepancies in data collected from diverse sources, multiple listings of what are in fact the same owner may occur.) The Business Name and Domain Name sections of the report are not included in this index.

This tool is designed to facilitate your review of the search report and to help you identify trends in data. There has been no analysis made to determine if the company name listed is the actual owner of the trademark. In the case of USPTO listings, only officially reported owners are included; assignees are not considered owners for the purpose of this index.
