**Subject:** PWC Simulator Quote

Erika,

As per our conversation Thursday, please transform our funky Jet Ski and trailer into a thing of brilliant beauty. We would like to see:

- Powder coated diamond plate around the Jet Ski and trailer to simulate water and to be a “step” for our customers to use to get on the Jet Ski
- Can you permanently attach the Jet Ski to the trailer – we would like to remove the tie-downs from the back and front of the trailer, if you need to drill into the body of the Jet Ski, please do so
- Please install scissor jacks under the back of the trailer for stability
- Below are pictures of a simulator with the above specifications, please use your creative juices to make an astonishing simulator for Arizona ☺
- Any questions, please feel free to give me a call

Cheers,

***Kim***
