

Magnetic signs are rubber coated magnetic material which is ideal for removable signs, decals, or other markings used on metal surfaces such as vehicles. These signs can be as much as 24" in one direction and virtually unlimited in the second direction. Vinyl letters and graphics are the standard for very small quantities having a simple design. Larger quantities and/or greater complexity of design are usually silk-screened.

Magnetic signs are specifically designed with a magnetic backing to be mounted to a metal surface. These signs are easily applied to any surface that a standard magnet would stick to.
