MPDC-6100 Single Bunk

The MPDC-6100 single bunk is built for institutional and commercial use and is well suited for fire stations, dormitories, shelters & detention facilities.

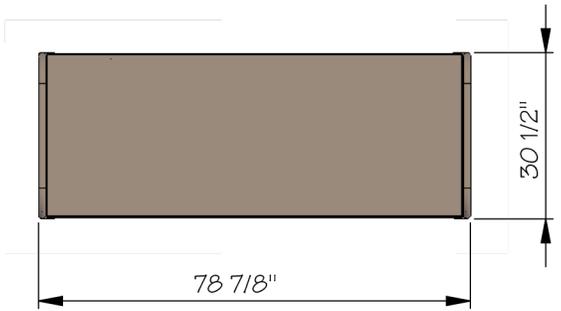

This heavy duty bunk is shipped in 3 separate pieces and can be easily assembled by the customer or by the ACI install crew.

The bedpans are 14 ga. steel with a 2" lip around the edge. The endrails are 1" Sch. 40 steel pipe with 7 ga. steel baseplates. We recommend anchoring the bunks to the existing floor with 3/8" wedge anchors which are provided with your order.

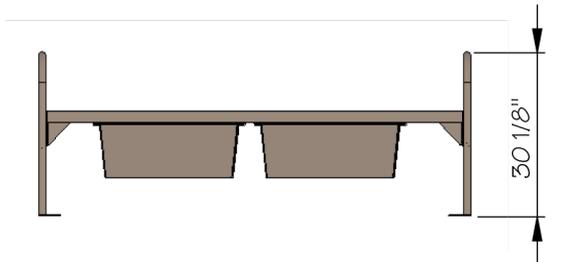

Accessories are available including the MPDC-6110 underbunk storage drawers (Shown above). All the components have a baked on powdercoat finish and colors can be selected from manufacturers standards.

Shipping weight is approx. 151 lb.s

Contact your ACI area sales representative at ph. 602-272-7600 for pricing, availability and quantity price discounts.
