## ANALYST REVIEW – USPTO REPORT

### Search Information

Type of Search: **U.S. Design Search**  
Mark: **DESIGN OF STYLIZED "ACI" FEATURING COGS/GEARS, ARIZONA FLAG**  
Goods/Services: **PROVIDING MANPOWER FOR MANUFACTURING, PRINTING, CALL CENTER**

### Data Information

This search report includes information from the USPTO Official Gazette published on **04/14/2015** and pending applications filed through **04/10/2015**. The pending applications are received from the U.S. Patent and Trademark Office and are updated to our database as they are made available.

Our proprietary coding, used to make design or image elements searchable, has been added to pending applications filed through **04/09/2015**

Our database includes active USPTO text records dating from **1884** to present.

All queries in the Search Strategy below have been applied to all active applications and registrations in our database, as well as inactive USPTO applications and registrations from 01/01/2010 to the present. Inactive USPTO applications and registrations from 01/01/1984 – 01/01/2010 were searched for identical trademarks.

### Last Reported Owner

"Last Reported Owner" is our best determination of the owner of a trademark, based on a programmatic analysis of USPTO trademark records and any assignment transactions associated with the trademark. In determining "Last Reported Owner", we exclude recorded documents representing security interests, liens and other transactions which ordinarily do not result in a change of ownership.

### Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.

### Earliest Date in Record

The Earliest Date in Record is an added field derived from a programmatic review of all available fields within a given record to estimate the earliest date by which the trademark can claim protection. Fields reviewed can include the Date Filed and First Use Dates for both U.S. and international protection. Please note that not all records with a status of MISASSIGNED will be included, as many of these records do not contain dates. This field is designed to be a helpful reference tool only; further research may be required to determine the mark's priority rights.

### Analyst Information

Name: **MARY ANN RULIERA**  
Comments: **These queries, listed below, retrieved 4348 potential references from the database. After careful review and analysis, I have selected 94 records for your review.**

**REPORTED OWNER INDEX**

The following is an alphabetical listing of names reported in the OWNER field of records cited in this search report, with all marks owned by a single entity carried under that entity. (Due to inconsistent spellings, corporate designations, and other discrepancies in data collected from diverse sources, multiple listings of what are in fact the same owner may occur.) The Business Name and Domain Name sections of the report are not included in this index.

This tool is designed to facilitate your review of the search report and to help you identify trends in data. There has been no analysis made to determine if the company name listed is the actual owner of the trademark. In the case of USPTO listings, only officially reported owners are included; assignees are not considered owners for the purpose of this index.
